

Dear Students,

the speed of learning and the quality of the knowledge one receives about AI in healthcare are fundamental, that is why we want to draw your attention to an extra programme you can enrol, developed by **GE Healthcare**, **EIT Health** and many other top organisations, - **HelloAI**. HelloAI helps shape the future of medical work with AI with various courses empowering healthcare professionals with a broad AI proficiency that can elevate your studies and/or carrier.

We live in the era of AI. An individual's success and carrier development depend on the level of their comprehension of this complex but fascinating topic. 47% of physicians and 73% of medical students said that they are currently seeking out additional training or classes to better prepare themselves for innovations in healthcare expecting almost one-third of their job to be automated **by 2040** - according to the **Stanford Medicine Report**.

### What does HelloAI offer?

**Number of courses:** 4 (various levels of complexity)

- ➔ [HelloAI Basics](#) – for people interested about AI in Healthcare
- ➔ [HelloAI Advanced](#) – for students & researchers (ECTS credits available)
