

## WEB SEMINARS

24 Marzo – ore 16:00

on zoom platform (link at <http://www.sifb.it/>)

A composite image featuring a magnifying glass over a glowing, multi-colored 3D model of a cell. The cell model shows internal organelles like the nucleus and mitochondria. The background consists of a blurred laboratory setting with a blue pipette tip and a white petri dish. On the left, there are three distinct layers of material in green, red, and blue, possibly representing different biomaterials or cell layers.

Designing luminescent  
molecular and hybrid  
systems for staining cells  
and biomaterials

**Prof. Fausto Puntoriero**
