- **Heart Failure Association (HFA) of the European Society of Cardiology (ESC)**

The Applicant is currently board member of the HFA of the European Society of Cardiology (ESC). Given his expertise on registries and epidemiology, among others he is active member of the Committee on Surveys, Registries and Epidemiology. As such, he is heavily involved in 1) the ATLAS project, which is a unique compendium of data on the prevalence and incidence of heart failure, outcomes, health infrastructure and service provision across European countries; 2) he runs research projects in the Heart Failure Long-Term Registry II and contributed to the design of and will run research in the Heart Failure Registry III, which are among the most important registries in the field of heart failure worldwide.

The Applicant also actively contributes to the scientific production of the association, i.e. position documents and guidelines, and is currently leading a position document to tackle physicians' clinical inertia which is a cause of underuse of treatments in patients with heart failure. For this purpose, he has recently organized a workshop in London (March 2022) where all the European experts in heart failure have joined to contribute to this ambitious project.
