

## *Software solutions for energy and beyond*

BaxEnergy is more than just a technology company. Our mission is to leverage technology to make people's lives and the world we live in more sustainable.

We are looking for talented people who stand out and who are eager to do the best job of their life while supporting others in doing the same. Our team values cross-team collaboration and the innovation that each member can bring.

We believe that different backgrounds, experiences and perspectives can help us think big, drive innovation and succeed together.

## **Company Description**

BaxEnergy provides software solutions for the visualization, analysis and optimization of cross-technology renewable energy power plants distributed all over the world. The company provides extensive domain expertise combined with the latest intelligent technology to develop next-gen asset management platforms. More recently, the company has developed technologies and products for energy trading, power forecasting, industrial battery storage management and other solutions for the management and monitoring of charging stations for electric vehicles. The monitoring platform, Energy Studio Pro®, enables its owner to fully monitor and remote control wind, photovoltaic, hydroelectric and geothermal power plants, as well as co-generation plants, gas turbines, thermoelectric power stations and electric charging stations.

## **We Are**

A group of passionate thinkers with the obsession of making business scalable and profitable, in energy and beyond. We do it just using our creativity, passion for innovation and rock-solid software. At BaxEnergy, passion for technology innovation is what moves us, and we work every day to turn it into cutting-edge software solutions destined to many different scenarios. Energy feeds technology and technology feeds us. We love to push ourselves farther, working closely with our partners for the same goals. We strive to meet and exceed the expectation of our customers worldwide. Their success is our success.

## **Vision**

We believe that renewable energies are fundamental for mankind, and innovation and technology are the key factors to foster their growth.

The aim of BaxEnergy is to make renewable energy easier, more efficient, affordable and secure, contributing to building a greener world for the benefit of present and future generations.

## **Mission**

Our mission is to offer innovative best-in-class solutions for clean renewable energy, where we are pioneers.

By combining extensive domain expertise with the latest cutting-edge technologies, we deliver innovative turn-key solutions to visualize and analyze power plants' data, optimizing operations across multiple technologies and manufacturers.

## **What we do and how we do it**

Whenever we design a new feature, the development team focuses on one thing: the people who will use it.

Our team values cross-team collaboration and the innovation that each member can bring. We believe this is the best way to create a product that is useful and which will fully satisfy our customers and with a lasting impact over time.

## **INTELLISYNC**

### **Company Description**

Founded in 2017, Intellisync operates through the following business lines: 24/7 NOC & SOC Services and Digital Transformation. In its first line of business, the company provides Cybersecurity as a Service (CaaS) and defends different kinds of assets against external threats and internal intrusions.

The company offers 24/7 dedicated Network and Security Operation Centers (NOC / SOC), for collecting and integrating any kind of data, monitoring, and securing any kind of asset, across multiple industries.

In its second line of business, the company stands out in the development

of projects for the business digitization, providing solutions ranging from software development to project management, from marketing to ICT and security, with a mix of consulting and seeding approaches.

Our team is made up of well-trained people that have in common the passion for technological innovation, data analysis, and digital transformation that are changing the way we live and do business.

Intellisync takes the lead in Telco, Energy, Banking & Finance, Fashion Retail and Retail sectors, supporting different kinds of public and private companies in creating the change that matters the most to them.
