

Leading Towards Sustainable Gender Equality Plans in research institutions – **LeTSGEPs** – aims at connecting different Research Performing Organisations (RPOs) in the design and implementation of **Gender Equality Plans (GEPs)**.

The project seeks to design actions and implement measures that will lead to systemic institutional change and address gender bias in RPOs at a very initial stage of gender equality measures implementation, thanks also to the help of the more experienced partners.

As a powerful instrument of detecting factors that make gender inequality persistent within institutions, besides the Gender Equality Plans, LeTSGEPs will foster the use of **Gender Budgeting (GB)**, since budgets reflect real policy commitments.

This project received funding from the European Union's Horizon 2020 Research and Innovation program under Grant Agreement n° 873072
